Subject: Removal of KW Construction Suspension

Dear Kingdom Workers,

As information about COVID-19 has increased and experience working on construction sites in the COVID environment has grown across America, we are confident in our ability to prudently and successfully conduct construction projects. The suspension of construction projects is lifted and Kingdom Workers Construction and Builders For Christ projects may take place effective immediately.

Attached to this letter are guidelines for construction projects produced by OSHA and adopted by Kingdom Workers. When Kingdom Workers Builders For Christ volunteers work under a general contractor, the volunteer team is to follow the posted guidelines of the general contractor and any local directives. If there is no general contractor, or if the general contractor has no posted guidelines, or if the posted guidelines seem inefficient, please contact Director Jeff Ulman to discuss the situation and then follow the Kingdom Workers guidelines.

Thank you for your many prayers for the mission of Kingdom Workers. I humbly request you continue to pray and ask the Lord to bless our work with safety, good health, and beautiful construction.

In Christ,

A handwritten signature in black ink that reads "Bill Meier".

Bill Meier  
President & CEO

## COVID-19 Guidance for the Construction Workforce

OSHA is committed to protecting the health and safety of America's workers and workplaces during these unprecedented times. The agency will be issuing a series of industry-specific alerts designed to keep workers safe. When working in the construction industry, the following tips can help reduce the risk of exposure to the coronavirus:

- Encourage workers to stay home if they are sick.
- Allow workers to wear masks over their nose and mouth to prevent them from spreading the virus.
- Continue to use other normal control measures, including personal protective equipment (PPE), necessary to protect workers from other job hazards associated with construction activities.
- Advise workers to avoid physical contact with others and direct employees/contractors/visitors to increase personal space to at least six feet, where possible. Where work trailers are used, all workers should maintain social distancing while inside the trailers.
- Train workers how to properly put on, use/wear, and take off protective clothing and equipment.
- Encourage respiratory etiquette, including covering coughs and sneezes.
- Promote personal hygiene. If workers do not have immediate access to soap and water for handwashing, provide alcohol-based hand rubs containing at least 60 percent alcohol.
- Use Environmental Protection Agency-approved cleaning chemicals from List N or that have label claims against the coronavirus.
- To the extent tools or equipment must be shared, provide and instruct workers to use alcohol-based wipes to clean tools before and after use. When cleaning tools and equipment, workers should consult manufacturer recommendations for proper cleaning techniques and restrictions.
- Keep in-person meetings (including toolbox talks and safety meetings) as short as possible, limit the number of workers in attendance, and use social distancing practices.
- Clean and disinfect portable jobsite toilets regularly. Hand sanitizer dispensers should be filled regularly. Frequently touched items (i.e., door pulls and toilet seats) should be disinfected.
- Encourage workers to report any safety and health concerns.

Follow CDC recommended guidelines...

<https://www.cdc.gov/coronavirus/2019-ncov/index.html>

Whenever there is a General Contractor involved with construction, follow the GC guidelines and policies. Always following the more stringent guidelines between GC and KW guidelines and policies.
